

# Gitgit Waterfall Activities

Because this Waterfall is located away from the crowds, it offers stunning beautiful scenery accompanied by awesome, natural, and well-maintained rural air.

The cool and clear water will delight your eyes and is ideal for those of you who enjoy natural activities. Some photos will be suggested for those of you who want to share them on social media with your family or friends. It is highly recommended to visit the waterfall between 8 and 11 a.m. because the waterfall will look so beautiful and fresh with the added beautiful light.

You can also swim in the waterfall area, and there are several spots where you can soak and swim while being pampered by nature. Several water sources emit fresh water, which is frequently used as drinking water by locals.

Food and drink are also provided and can be purchased at the “*warung*” or small shop located on the road leading to Gitgit Waterfall.

You can also see clove plantations and the activities of local farmers in Gitgit Village along the way. Those who visit Gitgit Waterfall between July and August will be able to see how the clove flower harvesting process works.
